

MANUFACTURING FOR MEDICAL TECHNOLOGY

INDUSTRY SOLUTIONS

Amsler&Frey has been producing customised plastic parts for more than 50 years. As an experienced manufacturer of medical instruments, we are trusted by renowned customers from around the world working in the field of medical technology. All milled and lathed parts are processed exclusively dry. By ruthlessly dispensing with cooling water in all machines, we prevent contamination with hazardous foreign substances that are harmful to plastics.

Production

State-of-the-art lathes and milling machines with multi-axis technology in an air-conditioned production hall allow for high-precision in-house production. Highly qualified employees produce in a responsible manner instruments and medical devices that meet the most stringent quality standards.

Quality

- Amsler & Frey AG has been certified to ISO 13485 since 2006.
- Validated processes and machines guarantee consistent quality.
- State-of-the-art measuring equipment ensures that the tightest dimensional tolerances are observed and recorded.

Traceability

- All our medical-grade (MG) semi-finished products are managed in batches, ensuring traceability throughout.
- All order and production data is archived in line with customer requirements.

Service

- Process validations for your products.
- Materials, development and design consulting.
- Extremely short delivery times for prototypes, individual parts and series production.
