

ASSEMBLY SOLUTIONS FROM A SINGLE SOURCE

ASSEMBLIES

One of Amsler & Frey AG's core areas of expertise is the manufacturing of assemblies from various materials cost-effectively and within the shortest possible lead-time. Our experienced experts are available to help you along the entire value chain. The partnership-based collaboration enables efficient and effective production, from prototypes right through to serial production of sophisticated and high-quality assembly solutions.

Engineering and logistics

Innovations are time-critical. That is why our application engineers are always available during the different development stages, using their many years of experience to support the process. Our customers benefit from our significant in-house production knowledge and tried-and-tested material procurement channels. We take care of stock and C-parts management, thus reducing your procurement costs.

Assembly of components

Our skilled and well-coordinated team handles the assembly of components. We will provide modern and optimized assembly workstations for your project. The functional control and validation according to your specifications are self-evident for us. We guarantee a flawless and high-quality end product.

ADDED VALUE FOR YOU

- Many years of experience in developing assembly solutions
- Everything from one source
- Reduced throughput times
- Cost-conscious processing
